PREFACE

Malaysian Mineral Trade Statistics (MINTRADE) 2017, which is the 22nd edition of its kind, provides an overview of the Malaysia's mineral trade statistics during the year 2017. The efforts to enhance this annual series of publication of trade statistics data were undertaken by the officers and staffs of the Mineral Economics Section of the Department for the purpose of providing meaningful information to the public.

Malaysia's strong economic fundamentals, diversified structure and inherent dynamism have always been key factors to deliver economic growth. Against a background of broad-based global recovery and the relatively low volatility in the international financial markets, the Malaysian economy performed strongly in 2017 which recorded a robust growth of 5.9% compare to 4.2% in 2016. A key highlight for the year was the rebound in gross exports growth as global demand strengthened, mainly due to higher demand from major trading partners following the upswing in the global technology cycle, investment expansion in the advanced economies and the turnaround in commodity prices. Commodity exports also turned around in 2017, supported largely by the recovery in major commodity prices. While real GDP growth was boosted by the external sector, domestic demand continued to anchor growth. The improvements in the global and domestic economy far exceeded earlier expectations, with growth being broad-based, entrenched, and synchronised despite ongoing political and policy uncertainties in the major economies, threats from geopolitical and financial market developments, and commodity price volatility (Annual Report 2017, Bank Negara Malaysia).

As for the review of minerals and mineral-based sector performance in 2017, Malaysian imports increased by 16.69 % to RM 79.03 billion in 2017 from RM 67.73 billion in 2016. The main minerals and mineral-based products imported were bauxite, copper ores & concentrates, lead ores & concentrates, manganese ores & concentrates, tin ores & concentrates, zirconium ores & concentrates, bentonite, fuller's earth, kaolin, sand & gravel and coal. The exports as well increased by 25.25 % to RM 44.45 billion in 2017 from RM 35.49 billion in 2016. The main minerals and mineral-based products exported in 2017 comprised chromium ores & concentrates, copper ores & concentrates, gold ores & concentrates, tin ores & concentrates, zirconium ores & concentrates, aggregates, dimension stone, fuller's earth, coal, cobalt oxide, iron & steel, rare earth-based products, zinc-based products, glass and lime.

Last but not least, I would like to express my sincere appreciation to those who give their full commitment to the completion of this publication. My gratitude also goes to the Department of Statistics Malaysia for their kind and continuous cooperation in providing the raw data that have supported the publication of this report.
